**LIFE SAFETY
EQUIPMENT**

When someone collapses from Sudden Cardiac Arrest, immediate CPR and use of an AED are essential for any chance of recovery. The AED analyzes the heart rhythm of the victim, and if necessary, a computerized command will instruct the user to press a button to deliver an appropriate shock to restore the normal operation of the heart. These devices are failsafe and will not cause injury to the user, nor will they deliver a shock if none is needed. For patients in "VF", studies show that if early defibrillation is provided within the first minute, the odds are 90 percent that the victim's life can be saved. After that, the rate of survival drops ten percent with every minute. As many as 30 to 50 percent would likely survive if CPR and AEDs were used within five minutes of collapse.

The Activar Construction Products Group (ACPG) consists of 5 affiliated companies that serve the commercial construction industry. Our multiple product lines are a single source for architects and distributors. Air Louvers manufactures products for the openings market with door lites, louvers and rated-glass. Hiawatha is known for its quality architectural door hardware and frameless shower door products. JL Industries is an industry leader in fire protection, providing fire extinguishers, AEDs and cabinets, access panels, roof opening products and entrance flooring systems. Samson Products manufactures many of the products sold under the JL label and distributes JL products on the West Coast. Thomas Enterprises is our Southeast warehouse distributor for JL products and has a state-of-the-art aluminum fabrication facility for fire extinguisher cabinets sold under the Thomas and JL labels.
