

CLEANING INSTRUCTIONS FOR METAL PRODUCTS - VISION LITES & LOUVERS & PROTECTION PLATES

Our products are designed to be maintenance free. However, it is recommended that the surfaces of the products be kept clear from debris and dirt. Frequent cleaning extends the life of all finishes.

If latches, locks or hinges need to be lubricated, use a "3 in 1" type light oil, removing excess with a cloth.

Material	Finish Description	Cleaning & Maintenance
Steel & Aluminum	Powder Coat Paint	Use a soft cloth and mild soap and water.
Aluminum	Aluminum Without Clear Coat	
Stainless Steel	304 Stainless Steel with #4 finish (US32D)	Use a soft cloth and mild soap and water solution. After cleaning, thoroughly rinse with clear water to remove all traces of the solution and wipe dry to prevent water marks from forming. Stains which resist that treatment can usually be removed by polishing in the direction of the grain with a soft cloth and a non-abrasive stainless steel polish such as Mr. Metal by Northern Labs. Test in an unobtrusive area. Do not use steel wool or a wire brush which may embed particles into the product and rust.
Fabric	Screen for Privacy Shade	Use a soft cloth and mild soap and water solution.
