

The 400 Series grate is designed for heavy-duty, high-traffic areas with a 750 lb wheel load rating. Densely spaced treads provide more surface area than mats, to keep your building cleaner. Contains LDPE hinges to cushion each tread rail that is quieter than aluminum hinges. Grate rolls up compactly for ease of cleaning. Drainage holes between tread rails allows moisture and dirt to fall below mat.

### ALUMINUM ROLL-UP ENTRANCE GRATE WITH LDPE HINGES

**Rolling Wheel Load Rating:** 750 lbs

- Verify traffic direction - traffic to run perpendicular to rails.
- Maximum single section size not to exceed 12'-0" (3.66m) in width (dim "x") or 100 sq. ft.
- If multiple sections, verify sectioning does not occur in traffic path.
- Vinyl filler on the ends of the traffic directions to be trimmed in field for tight fit.
- Mat dimensions allow for clearance between mat section(s) and frame(s) in width (dim "x").
- Additional product information including installation instructions may be found on our website.

*Interpretation of fire and building codes may vary. Consult with the local authority having jurisdiction (AHJ) to determine appropriate standards.*
