

Saddle Thresholds

- 1. Measure door sill (frame width at bottom) and cut the threshold to extend the full width of the opening.
- 2. Notch the threshold sides if necessary to accommodate the side jamb stops.
- 3. Fasten on threshold to the sill with screws provided.
- 4. Operate the door several times to ensure the part is properly adjusted so as not to inhibit the door from self-closing and latching.

Positive Pressure Tested Gasketing Materials for Fire Doors. Intended for Application to/ with listed steel frames and/or classified steel covered composite, hollow metal type fire doors rated up to 3 hours, wood and plastic covered composite type fire doors rated up to 1-1/2 hours, and wood core type fire doors rated up to 20 minutes.
